

Alex Costa, MSc

Alex Costa is Senior Tech & Innovation Manager at LEO Science & Tech Hub. He has a MSc in Medical Biotechnology from Norwegian University of Science and Technology and a MSc in Business Administration and Bio-entrepreneurship from Copenhagen Business School. He joined LEO Pharma in 2014 in Copenhagen and has worked in different functions within innovation and scientific affairs. He recently moved to Boston to ensure LEO is well embedded within the different innovation ecosystems in US and has access to cutting edge research and technologies. In the past he has worked with implementation of LEO's open innovation platform. Following that he worked extensively on launching global projects and building partnerships with key opinion leaders, patient organizations and medical societies. He has mentored several start-ups and is currently a mentor for the MIT Sandbox Innovation Programme.
