

Suresh Gopalan

Suresh Gopalan, PhD is an entrepreneur, mechanical engineer and biotechnologist. He is the CEO and founder of ReSurfX, a decision analytics company. ReSurfX enables better decisions and outcomes for Pharma and Healthcare through robust accuracy, novel insights and by advance prediction of outcome directions from large volumes of data using our paradigmatic 'Adaptive Hypersurface Technology'. Our powerful and integrative solutions and products for data generation and utilization help enterprises navigate ongoing digital transformation to achieve superior ROI and thrive in the evolving outcomes-based economy. The concept behind technology used by ReSurfX (with 14 issued patents) – that brings a new dimension to the terms 'personalization' and 'accuracy' was invented by Suresh Gopalan.
